Disclaimer: Spring Link will break at approximately 250lbs. pull pressure. Note: Sunguard Shade Sails™ are extremely durable and can withstand high winds. What the sail is attached to, may not be strong! If you are confident the attachment point can withstand a minimum 200-250 pull pressure, use the Spring Link to provide protection for forces in excess of 250lbs. Apollo Sunguard Systems, Inc. is not responsible for any structural damage caused by failure to remove sail in any wind event with or without Spring Link.
